

CONCEPT AND MVP DESIGN

IndulgeApp Diaspora Community Platform

Community discovery balancing local relevance, verification, privacy and moderation

Status: Concept / MVP design

Domain: Community technology and diaspora services

Role: Founder and Product Business Analyst

The problem and what discovery found

Business problem

People discover communities, trusted information and events through fragmented social channels, while group leaders lack connected engagement and event tools.

What the analysis found

1

Diaspora users search across many social channels

2

Group legitimacy is hard to judge

3

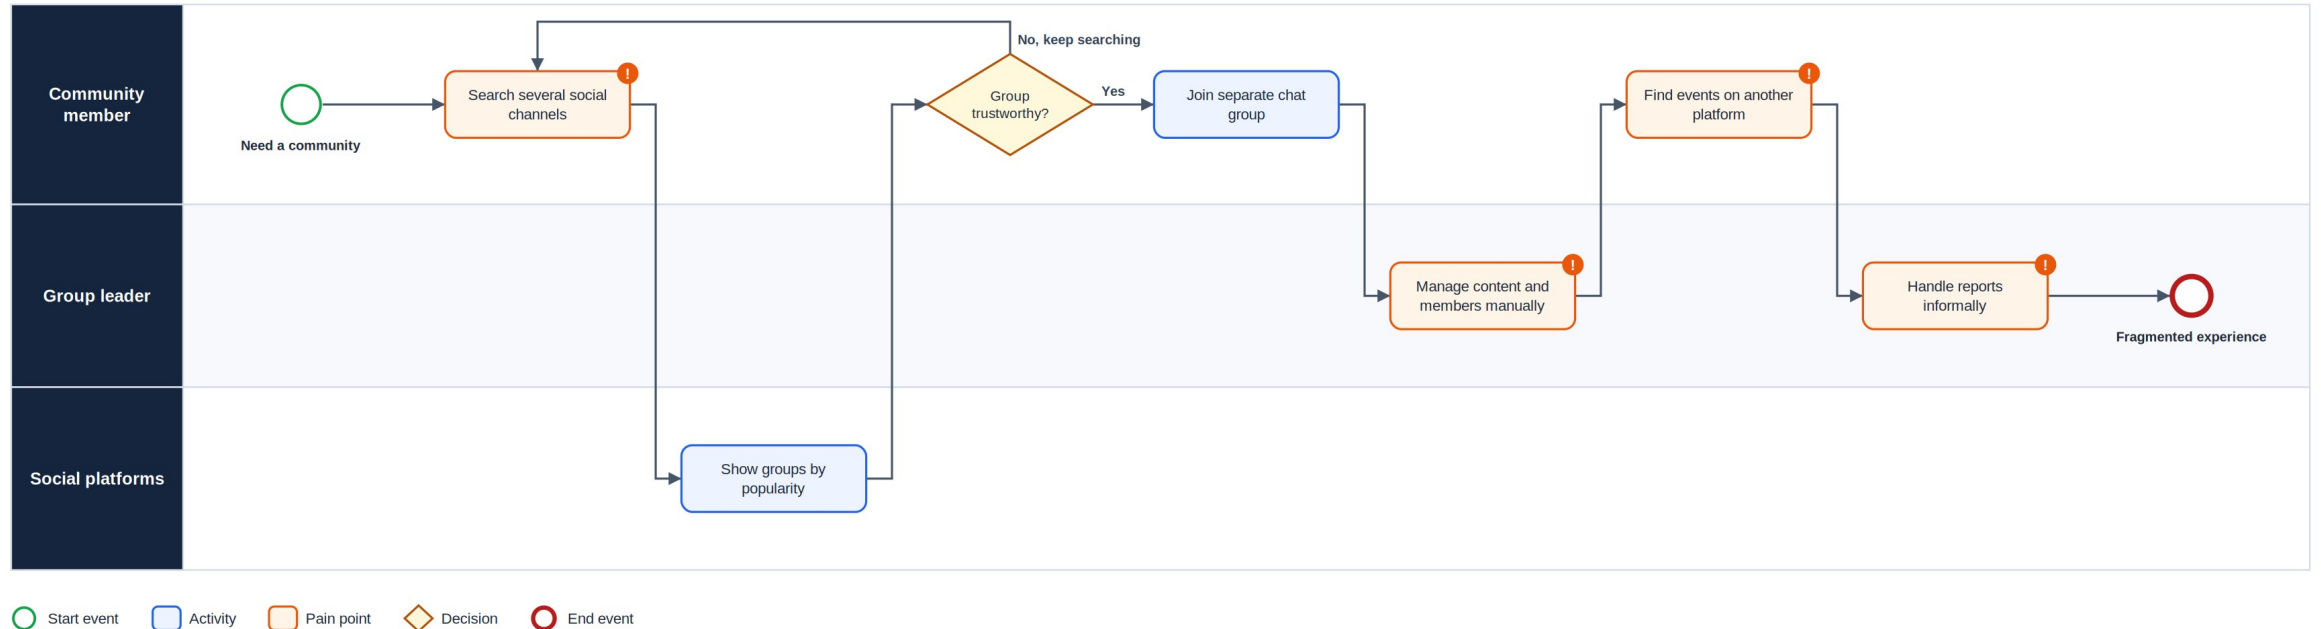

Leaders manage content, events and payments in separate tools

As-Is process

Full-resolution SVG is in the Diagrams folder

IndulgeApp: As-Is process

Current state before the redesign. Orange activities are the pain points found in discovery.

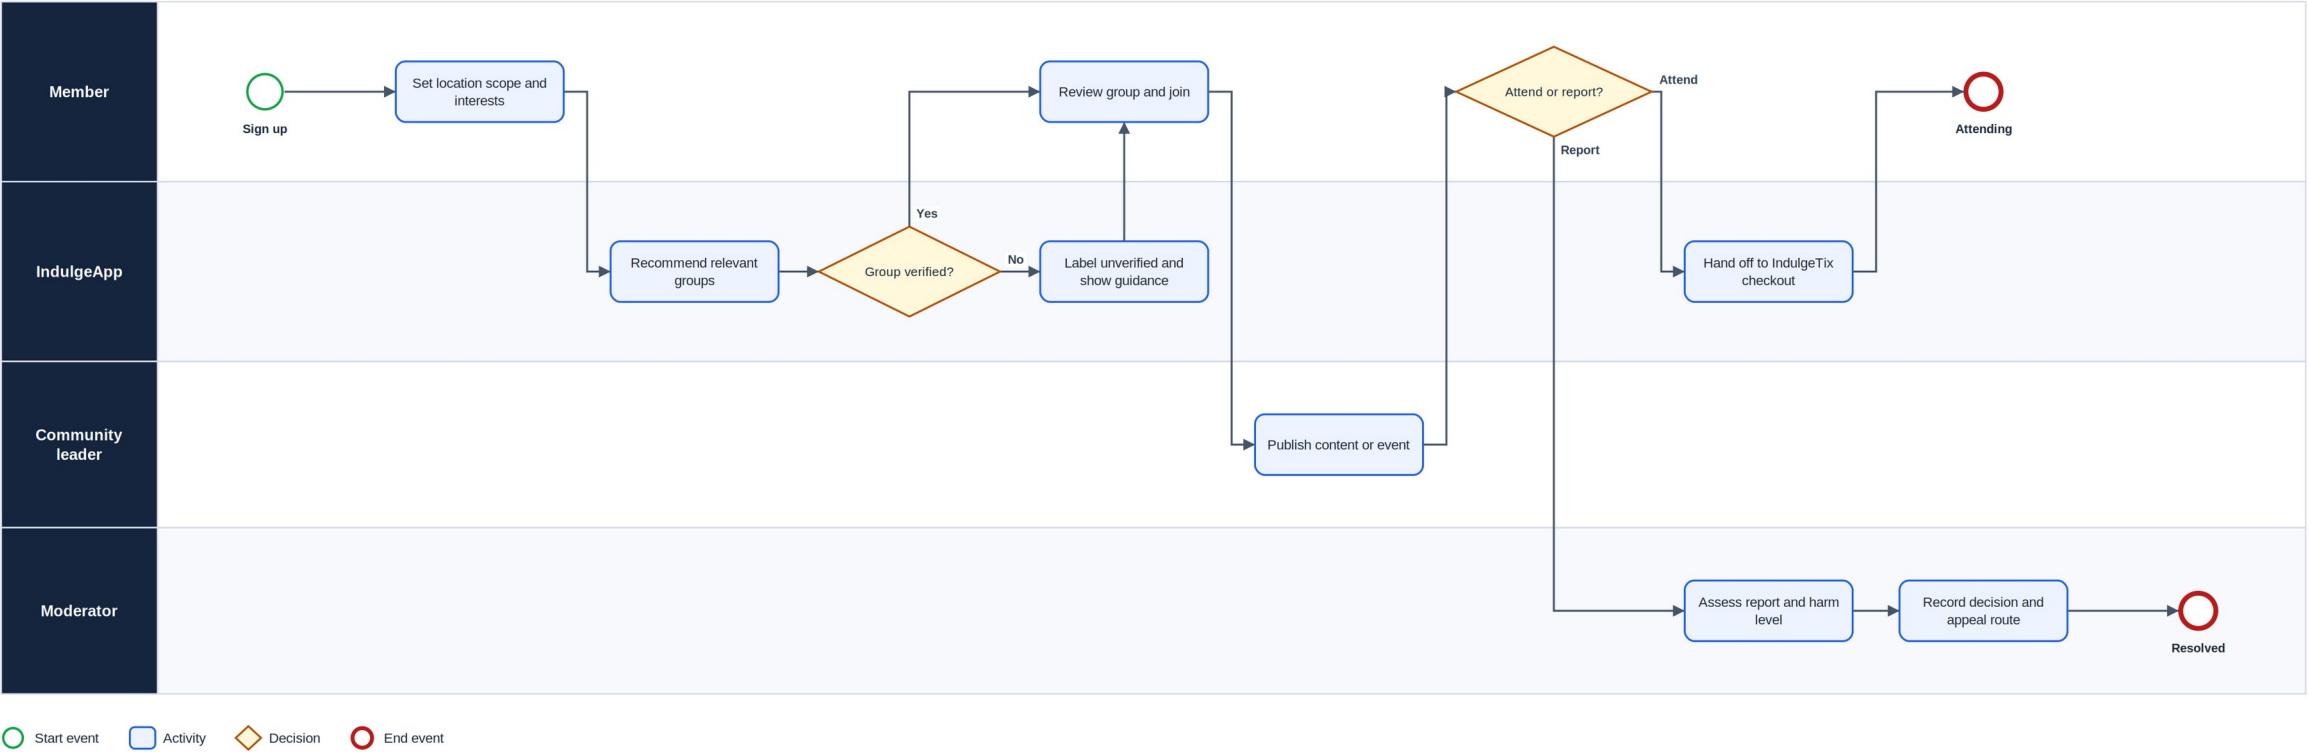

To-Be process

Full-resolution SVG is in the Diagrams folder

IndulgeApp: To-Be process

Designed future state, with every decision outcome labelled.

Proposed operating-model change

Area	Before	After
Discovery	Search across many platforms	Groups recommended by chosen area and interest
Trust	Verification unclear	Approved status with evidence and expiry
Events	Promotion and ticketing elsewhere	Groups link members to event checkout
Safety	Reports handled informally	Evidence, owner, decision and appeal recorded

How success will be measured

No live outcomes are claimed for this case

Measure	Current evidence status	How it will be used
Join rate by verification	Defined for MVP	Test whether badges build trust
Report resolution time	Defined for MVP	High-harm within 24 hours
Group-to-event conversion	Defined for MVP	Validate the IndulgeTix link

Recommendations and key risks

Recommended next actions

- Run discovery interviews with group leaders in two cities
- Prototype privacy settings and test comprehension
- Draft the moderation playbook before launch
- Pilot event links with IndulgeTix organisers

Risks with a named owner

R-01

Location data exposes users

Minimum precision and privacy defaults

R-02

False verification

Evidence review and expiry

R-03

Harmful content or group

Reporting and moderation workflow

R-04

Recommendations create filter bubbles

User controls and monitoring
