

Business Requirements Document

Status: Concept / MVP design | Domain: Community technology and diaspora services | Role: Founder and Product Business Analyst

Business problem

People discover communities, trusted information and events through fragmented social channels, while group leaders lack connected engagement and event tools.

Objectives

ID	Objective
OBJ-01	Improve trusted community discovery
OBJ-02	Support location-aware relevance with user control
OBJ-03	Connect groups to events
OBJ-04	Provide traceable moderation

Scope

In scope	Out of scope
Location and interest preferences Group verification Community content IndulgeTix event link Reporting and moderation	In-app payments for groups Direct messaging between strangers

Business requirements

ID	Requirement	Priority	Objective	Acceptance criterion
BR-01	Users discover relevant groups by location and interest	Must	OBJ-01	Results respect selected preferences
BR-02	Verified status is clear and controlled	Must	OBJ-01	Only approved groups show verification
BR-03	Users control location visibility and notifications	Must	OBJ-02	Setting changes alter platform behaviour immediately
BR-04	Groups can link events to IndulgeTix	Should	OBJ-03	Event and ticket route opens from the group
BR-05	Reports and moderation actions are traceable	Must	OBJ-04	Status, decision, owner and appeal route are recorded

Assumptions and constraints

Assumptions	Constraints
Group leaders can provide verification evidence IndulgeTix handles ticketing	Data protection rules on location data Small moderation capacity at launch

Key risks

ID	Risk	Severity	Response	Owner
R-01	Location data exposes users	High	Minimum precision and privacy defaults	Product owner
R-02	False verification	High	Evidence review and expiry	Moderation lead
R-03	Harmful content or group	High	Reporting and moderation workflow	Moderation lead
R-04	Recommendations create filter bubbles	Medium	User controls and monitoring	Product owner
