

Functional Requirements Document

Status: Concept / MVP design | Domain: Community technology and diaspora services | Role: Founder and Product Business Analyst

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Recommendation list filters by chosen area and interests	Area options: city, region, country
FR-02	BR-02	Verification badge shows only after moderator approval	Badge expires after 12 months without review
FR-03	BR-03	Privacy settings control location precision and notifications	Default is city-level, never exact location
FR-04	BR-04	Group event card deep-links to IndulgeTix checkout	Link opens only for published events
FR-05	BR-05	Report form records reason, evidence and reporter	Decision and appeal route sent to reporter

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-03	As a member, I want to share only my city, not my exact location, so that I feel safe using the app.	Given I open privacy settings When I choose city-level Then recommendations use my city and no precise location is stored
US-02	BR-05	As a moderator, I want every report to have evidence and an owner, so that decisions are fair and traceable.	Given a report is submitted When I assess it Then my decision, reason and appeal route are recorded

Non-functional requirements

Area	Requirement
Privacy	Location stored at chosen precision only
Safety	High-harm reports reviewed within 24 hours
Transparency	Users can see why a group was recommended

Key data

Field	Type	Allowed values
user_id	Text	Internal ID
location_scope	Category	City, Region, Country
group_id	Text	GRP-0001 format
verification_status	Category	Unverified, Pending, Verified, Expired
report_status	Category	Open, Under review, Actioned, Dismissed, Appealed
