

# Business Requirements Document

Status: Delivered | Domain: Retail and e-commerce | Role: IT Project Manager, E-commerce and Digital Systems

## Business problem

Fragmented delivery updates, repetitive customer enquiries and inconsistent custom-order requirement capture reduced visibility and created friction in the customer journey.

## Objectives

| ID     | Objective                                                   |
|--------|-------------------------------------------------------------|
| OBJ-01 | Create clear ownership and delivery visibility              |
| OBJ-02 | Improve customer support and custom-order journeys          |
| OBJ-03 | Support Microsoft 365 adoption and controlled collaboration |
| OBJ-04 | Validate changes and measure post-implementation value      |

## Scope

| In scope                                                                                                                                                                                | Out of scope                                                                                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|

## Business requirements

| ID    | Requirement                                                             | Priority | Objective | Acceptance criterion                                                              |
|-------|-------------------------------------------------------------------------|----------|-----------|-----------------------------------------------------------------------------------|
| BR-01 | Leadership can view project status, ownership and blockers in one place | Must     | OBJ-01    | Every active item shows owner, status, due date and dependency                    |
| BR-02 | Authorised colleagues can access controlled shared information          | Must     | OBJ-03    | Current documents are accessible according to role; unauthorised access is denied |
| BR-03 | Customers receive consistent answers to common questions                | Should   | OBJ-02    | An approved answer is returned, or the query is escalated to a person             |
| BR-04 | Custom-order specifications are confirmed before fulfilment             | Must     | OBJ-02    | Required details and customer confirmation are recorded before production starts  |
| BR-05 | Changes are tested with business users before release                   | Must     | OBJ-04    | Agreed scenarios pass and exceptions are logged and retested                      |

## Assumptions and constraints

| Assumptions                                                                                                             | Constraints                                                                                                  |
|-------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| Business owner remains the final approver for scope and release<br>Customers will accept a structured custom-order form | Small team with mixed technical confidence<br>External developers and providers delivered parts of the build |

## Key risks

| ID   | Risk                                     | Severity | Response                                          | Owner                 |
|------|------------------------------------------|----------|---------------------------------------------------|-----------------------|
| R-01 | Users revert to fragmented communication | Medium   | Demonstrations and one agreed channel per purpose | Business owner        |
| R-02 | Custom requirements are misunderstood    | High     | Structured capture and customer confirmation      | Customer service lead |
| R-03 | Automated answers become inaccurate      | High     | Approved content and escalation route             | Customer service lead |

| ID   | Risk                                       | Severity | Response                           | Owner              |
|------|--------------------------------------------|----------|------------------------------------|--------------------|
| R-04 | Permissions expose information incorrectly | High     | Role-group access and access tests | IT project manager |
