

Communications Plan

Status: Delivered | Domain: Retail and e-commerce | Role: IT Project Manager, E-commerce and Digital Systems

Approach

Communication is tied to each audience, its decisions and its moments of need, rather than one generic update for everyone.

Communications plan

Audience	Information	Channel	Cadence or trigger
Business owner	Milestones, options, decisions, benefits	Decision-focused review	Weekly
Customer-service team	Process changes, escalation routes	Demonstration and feedback session	Before each release
Developers	Workflows, data, acceptance criteria	Requirements walkthrough and backlog	Each sprint
Creatives	Priorities, asset deadlines	Visual brief and checkpoint	Per asset batch
Customers	Product, order and support information	Usability checks and feedback	At launch and post-launch

Decision controls

- Record the decision, owner and date
- State the evidence or constraint considered
- Show the impact on requirements, process or release
- Escalate unresolved high-impact items
