

UAT and Validation Plan

Status: Delivered | Domain: Retail and e-commerce | Role: IT Project Manager, E-commerce and Digital Systems

Approach

Scenarios come from the acceptance criteria. Defects are logged with reproduction steps, fixed and retested before closure. Scenarios were run with business users before sign-off. Detailed test logs are client records and are not published.

Test scenarios

Test	Req.	Given	When	Then	Status
UAT-01	BR-01	items exist on the delivery board	the owner opens the weekly summary	blocked and overdue items show owner, due date and dependency	Passed
UAT-02	BR-02	a colleague without the finance role	they open the finance library	access is denied and the attempt is logged	Passed
UAT-03	BR-03	a customer asks a delivery-time question	the chatbot receives it	the approved answer is returned	Passed
UAT-04	BR-04	a custom request without confirmation	staff try to move it to production	the move is blocked until confirmation is recorded	Passed
UAT-05	BR-05	release candidate is ready	the scenario pack is run with business users	all Must scenarios pass and exceptions are logged	Passed

Exit criteria

- All Must scenarios pass
- High-severity defects fixed or formally accepted
- Business owner confirms the outcome
- Known limitations and follow-up actions recorded
