

Functional Requirements Document

Status: Delivered | Domain: Digital marketing, media and entertainment | Role: Digital Marketing Analyst and Delivery Lead

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Brief template requires objective, audience, channel mix and KPI	Production cannot start on an unapproved brief
FR-02	BR-02	Task board records owner, due date, dependency and approval	Assets move to publishing only after brand check
FR-03	BR-03	Campaign report pulls channel metrics into one template	Metric definitions follow the KPI dictionary
FR-04	BR-04	Post-campaign review logs recommendations and decisions	Each recommendation cites the metric that supports it

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-01	As a client, I want to approve the objective before assets are made, so that the work targets the outcome I need.	Given a draft brief exists When I approve it Then production tasks are released to the team
US-02	BR-03	As a account lead, I want one report with consistent metric definitions, so that I can compare campaigns fairly.	Given a campaign has ended When I open the report Then reach, engagement, traffic and conversion show against target

Non-functional requirements

Area	Requirement
Consistency	One KPI dictionary used by every account
Timeliness	Report available within one week of campaign end
Traceability	Recommendations link to supporting metrics

Key data

Field	Type	Allowed values
campaign_id	Text	CMP-0001 format
channel	Category	Instagram, TikTok, X, YouTube, Website
reach	Integer	0 or more
engagement	Integer	0 or more
website_sessions	Integer	0 or more
conversion	Integer	Defined per brief
