

# UAT and Validation Plan

Status: Delivered | Domain: Digital marketing, media and entertainment | Role: Digital Marketing Analyst and Delivery Lead

## Approach

Scenarios come from the acceptance criteria. Defects are logged with reproduction steps, fixed and retested before closure. Scenarios were run with business users before sign-off. Detailed test logs are client records and are not published.

## Test scenarios

| Test   | Req.  | Given                         | When                                          | Then                                                 | Status |
|--------|-------|-------------------------------|-----------------------------------------------|------------------------------------------------------|--------|
| UAT-01 | BR-01 | a brief without a KPI         | the lead tries to release production tasks    | release is blocked until the KPI is added            | Passed |
| UAT-02 | BR-02 | an asset awaiting brand check | the social manager opens the publishing queue | the asset is not available to publish                | Passed |
| UAT-03 | BR-03 | a finished campaign           | the report is generated                       | all four measures appear with dictionary definitions | Passed |
| UAT-04 | BR-04 | a review meeting has ended    | the lead records outcomes                     | each recommendation links to a metric and a decision | Passed |

## Exit criteria

- All Must scenarios pass
- High-severity defects fixed or formally accepted
- Business owner confirms the outcome
- Known limitations and follow-up actions recorded
