

Functional Requirements Document

Status: Delivered | Domain: Events and hospitality | Role: Digital Project Manager and Business Analyst

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Landing page asks the visitor to choose attendee, vendor or volunteer	Choice loads the matching form only
FR-02	BR-02	Mandatory fields are validated before submission	Vendor: business name, category, food-safety evidence; Volunteer: availability
FR-03	BR-03	Every submission creates a record with route, status, owner and next action	Status values: Submitted, Under review, Approved, Declined, Allocated
FR-04	BR-04	Approve or decline action sends the matching template	Message is only sent after the status update succeeds
FR-05	BR-05	Volunteer records hold availability slots and allocated role	A volunteer cannot be allocated to overlapping slots
FR-06	BR-06	Ticket purchase returns a confirmation email with ticket reference	Failed payments do not generate a ticket

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-01	As a vendor, I want an application that only asks what vendors need, so that I can apply quickly and correctly.	Given I choose Vendor on the landing page When the form loads Then I see vendor fields and guidance only
US-02	BR-04	As a organiser, I want decision emails sent from the record, so that vendors never get a message that contradicts our records.	Given a vendor application is under review When I mark it Approved Then the status updates and the approval email is sent
US-03	BR-03	As a organiser, I want one view of all submissions and their next action, so that nothing is missed before the event.	Given submissions exist across all three routes When I open the status view Then each record shows route, status, date and owner

Non-functional requirements

Area	Requirement
Usability	Forms complete on mobile without horizontal scrolling
Reliability	Fallback message template if the email service fails
Privacy	Only organisers see applicant contact details
Auditability	Decision date and decision-maker recorded on each vendor record

Key data

Field	Type	Allowed values
submission_id	Text	NFF-0001 format
user_route	Category	Attendee, Vendor, Volunteer
submission_status	Category	Submitted, Under review, Approved, Declined, Allocated
decision_by	Text	Named organiser
confirmation_sent	Boolean	True, False

Field	Type	Allowed values
assigned_owner	Text	Named organiser
