

Business Requirements Document

Status: Ongoing (2024 to present) | Domain: SME digital services: marketing operations and web development | Role: Business Analyst

Business problem

Small-business owners arrive with a solution already in mind, such as a new website or more sales from social media. Underneath there is usually no agreed goal, enquiries scattered across direct messages, forms and spreadsheets, and no way to see what marketing or the website actually returns, all on a tight budget.

Objectives

ID	Objective
OBJ-01	Agree the business goal and success measure before anything is built
OBJ-02	Deliver websites and tools that fit the business's budget and capacity
OBJ-03	Capture every enquiry in one traceable record with a clear next step
OBJ-04	Make marketing and website performance measurable
OBJ-05	Leave the owner able to run the solution after handover

Scope

In scope	Out of scope
Discovery workshops and As-Is process mapping Requirements, user stories and MoSCoW prioritisation Website builds and improvements (WordPress, Shopify) Lead capture, CRM records and follow-up automation (Airtable, Make, Zapier) Marketing operations: campaign workflow, content calendar and reporting Analytics and consent (GA4, conversion tracking) UAT with the owner, handover guides and training	Ongoing paid-ad management Custom software beyond each client's budget Accounting and payroll systems Hosting and IT support contracts

Business requirements

ID	Requirement	Priority	Objective	Acceptance criterion
BR-01	Each engagement starts with a discovery brief the owner agrees	Must	OBJ-01	Goal, users, constraints and success measure are written down and signed off before build
BR-02	Scope is prioritised against the budget	Must	OBJ-02	Must items fit the budget; Should, Could and Won't items are recorded with reasons
BR-03	Enquiries from every channel land in one record	Must	OBJ-03	Website, form and social enquiries create a record with source, status and owner
BR-04	Routine follow-ups are automated	Should	OBJ-03	Confirmations and reminders send without manual copying
BR-05	Websites and campaigns are measurable, with consent	Must	OBJ-04	Key actions are tracked in GA4 and tags load only after consent
BR-06	Changes are tested with the owner before go-live	Must	OBJ-05	Agreed scenarios pass; issues are logged, fixed and retested
BR-07	Owners can run the solution themselves	Should	OBJ-05	A handover guide and walkthrough are completed before sign-off

Assumptions and constraints

Assumptions	Constraints
Owners can give a few hours for discovery and testing Off-the-shelf platforms meet most small-business needs The owner's team will run the tools after handover	Small, fixed budgets Owners with limited time No in-house technical staff at most clients

Key risks

ID	Risk	Severity	Response	Owner
R-01	Scope grows beyond a fixed small-business budget	High	MoSCoW prioritisation and a change log agreed with the owner	Business analyst
R-02	Owner has little time for discovery and testing	High	Short, structured sessions and clear decision points	Business analyst
R-03	Tools are abandoned after handover	Medium	Simple tools, training and a written guide	Business owner
R-04	Poor data quality in legacy spreadsheets	Medium	Validation at intake and a one-off clean-up	Business analyst
R-05	Tracking set up without consent	High	Consent-gated tags checked in UAT	Business analyst

Engagement model

Stage	What happens
1. Discover	Workshop with the owner to agree the goal, users, constraints and one success measure; map the As-Is process
2. Define	Requirements, user stories and acceptance criteria, prioritised with MoSCoW against the budget
3. Build	Website, forms, records and automations configured with the owner's platforms (WordPress, Shopify, Airtable, Make, Zapier, GA4)
4. Test	UAT with the owner on agreed scenarios; issues logged, fixed and retested before go-live
5. Hand over	Guide, walkthrough and a monthly review of performance by channel
