

Functional Requirements Document

Status: Ongoing (2024 to present) | Domain: SME digital services: marketing operations and web development | Role: Business Analyst

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Discovery template covering goal, users, current process and constraints	Owner confirms the brief before any estimate
FR-02	BR-02	Prioritised backlog with MoSCoW labels and estimates	Running total of Must items cannot exceed the budget
FR-03	BR-03	Website and landing-page forms write to one Airtable base	Each record stores source channel, status and owner
FR-04	BR-03	Social and messaging enquiries logged through a quick-add form	Duplicate contacts are flagged by email or phone
FR-05	BR-04	Make or Zapier scenarios send confirmations and reminders	Failed automations alert the owner
FR-06	BR-05	GA4 events on calls to action, forms and purchases	Tracking loads only after cookie consent
FR-07	BR-06	UAT checklist run with the owner on staging	No go-live with an open high-severity issue
FR-08	BR-07	Handover guide and recorded admin walkthrough	Owner completes one change unaided before sign-off

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-01	As a small-business owner, I want to agree what success looks like before I pay for a build, so that I get a website that grows the business, not just a new design.	Given I have asked for a new website When the discovery session ends Then I have a written goal, success measure and prioritised scope
US-02	BR-03	As a business owner, I want every enquiry in one place with its next step, so that no lead goes cold in my DMs.	Given an enquiry comes in through Instagram or the website When I open my records Then it is there with its source, status and who owns the follow-up
US-03	BR-05	As a business owner, I want to see which channels bring customers, so that I spend my marketing budget on what works.	Given campaigns are running When I review the month Then I can see enquiries and sales by source

Non-functional requirements

Area	Requirement
Affordability	Tools chosen for low running cost and no developer dependency
Usability	Owners can update content and records without training beyond the handover
Privacy	Customer data kept to what is needed; tracking only after consent
Maintainability	Every automation is documented with its trigger, steps and owner

Key data

Field	Type	Allowed values
lead_id	Text	Auto-generated ID
source_channel	Category	Website, Instagram, WhatsApp, Referral, Ads
status	Category	New, Contacted, Quoted, Won, Lost
owner	Text	Named staff member
