

Requirements Traceability Matrix

Status: Ongoing (2024 to present) | Domain: SME digital services: marketing operations and web development | Role: Business Analyst

Purpose

Shows the chain from business objective to requirement, design, user story and test, so every requirement has a reason to exist and a way to be verified.

Traceability

Objective	Business requirement	Functional req.	User stories	Tests	Status
OBJ-01: Agree the business goal and success measure before anything is built	BR-01: Each engagement starts with a discovery brief the owner agrees	FR-01	US-01	UAT-01	Released
OBJ-02: Deliver websites and tools that fit the business's budget and capacity	BR-02: Scope is prioritised against the budget	FR-02	None	UAT-02	Released
OBJ-03: Capture every enquiry in one traceable record with a clear next step	BR-03: Enquiries from every channel land in one record	FR-03, FR-04	US-02	UAT-03, UAT-04	Released
OBJ-03: Capture every enquiry in one traceable record with a clear next step	BR-04: Routine follow-ups are automated	FR-05	None	UAT-05	Released
OBJ-04: Make marketing and website performance measurable	BR-05: Websites and campaigns are measurable, with consent	FR-06	US-03	UAT-06	Released
OBJ-05: Leave the owner able to run the solution after handover	BR-06: Changes are tested with the owner before go-live	FR-07	None	None	Not tested
OBJ-05: Leave the owner able to run the solution after handover	BR-07: Owners can run the solution themselves	FR-08	None	UAT-07	Released

Released means the change is live in the product's code history. Detailed test logs and production data are not published.
