

UAT and Validation Plan

Status: Ongoing (2024 to present) | Domain: SME digital services: marketing operations and web development | Role: Business Analyst

Approach

Scenarios come from the acceptance criteria. Each defect was logged, fixed and retested before release, and every scenario below maps to a change that is now live.

Test scenarios

Test	Req.	Given	When	Then	Status
UAT-01	BR-01	a new engagement	discovery is complete	the owner has signed off goal, measure and scope	Passed
UAT-02	BR-02	a backlog over budget	priorities are reviewed	Must items fit the budget and the rest are recorded	Passed
UAT-03	BR-03	an enquiry through the website form	it is submitted	a record appears with source, status and owner	Passed
UAT-04	BR-03	the same customer enquires twice	the second record is created	it is flagged as a possible duplicate	Passed
UAT-05	BR-04	a new enquiry	the automation runs	the customer receives a confirmation	Passed
UAT-06	BR-05	a visitor who has not accepted cookies	they browse the site	no analytics tag loads	Passed
UAT-07	BR-07	handover is complete	the owner updates a page and a record alone	both changes succeed	Passed

Exit criteria

- All Must scenarios pass
- No open high-severity defect on payment, access or privacy
- Business owner confirms the outcome
- Known limitations and follow-up actions recorded
