

UAT and Validation Plan

Status: Delivered across client engagements | Domain: E-commerce, events and digital services | Role: Business Analyst

Approach

Scenarios come from the acceptance criteria. Defects are logged with reproduction steps, fixed and retested before closure. Scenarios were run with business users before sign-off. Detailed test logs are client records and are not published.

Test scenarios

Test	Req.	Given	When	Then	Status
UAT-01	BR-01	a new form submission	the workflow runs	one record with a unique ID is created	Passed
UAT-02	BR-02	a vendor record	status changes to Approved	the vendor approval template is sent once and logged	Passed
UAT-03	BR-03	a record with no owner	the operations view is opened	it appears in the unassigned view	Passed
UAT-04	BR-04	the email step is forced to fail	the automation runs	an exception with reason and time is created	Passed
UAT-05	BR-05	three solution options	the matrix is completed with the client	a recommended option with scores is recorded	Passed

Exit criteria

- All Must scenarios pass
- High-severity defects fixed or formally accepted
- Business owner confirms the outcome
- Known limitations and follow-up actions recorded
