

Functional Requirements Document

Status: Live | Domain: Wellness and hospitality | Role: Business Analyst (Contract)

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Floating WhatsApp widget and sticky mobile call to action	Message is prefilled with the service or page the visitor came from
FR-02	BR-02	Chat assistant trained on approved service, price and hours content	Flags booking requests with an auto-reply and link to WhatsApp
FR-03	BR-03	Click-event capture to a first-party table	Anonymous session ID only; insert-only access for visitors
FR-04	BR-03	Admin analytics dashboard with range picker	Ranges include Today by hour; totals by page and button
FR-05	BR-04	SEO layer: favicon set, share image, meta, sitemap, breadcrumbs	Every route has a canonical URL and unique title
FR-06	BR-04	Blog of local service guides	Each guide links to its service and to booking
FR-07	BR-05	Loyalty card page and Spin & Win prompt	Prompt does not clash with other pop-ups
FR-08	BR-06	Cookie consent banner controlling GA4 and Meta Pixel	No third-party request before consent

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-01	As a visitor on my phone, I want to book a massage with one tap, so that I do not have to search for a number.	Given I am reading a service page When I tap Book on WhatsApp Then WhatsApp opens with the service already named
US-02	BR-03	As the spa manager, I want to see which pages lead to booking taps, so that I know which services to promote.	Given visitors have tapped booking buttons today When I open the analytics dashboard Then I see taps by page and by hour
US-03	BR-02	As a visitor browsing late at night, I want an answer about prices and hours now, so that I can decide before the spa opens.	Given the spa is closed When I ask the assistant Then I get an approved answer and a link to book

Non-functional requirements

Area	Requirement
Usability	Designed mobile first; booking reachable within one tap on every page
Performance	Static pages and optimised images for fast mobile loads
Privacy	No personal data in click analytics; third-party tracking only after consent
Maintainability	Content and staff roster changes made without a developer

Key data

Field	Type	Allowed values
event	Text	whatsapp_click, page_view, chat_open
label	Text	Free text set by the page
path	Text	Site URL path
referrer	Text	URL or empty
