

Requirements Traceability Matrix

Status: Live | Domain: Event technology and payments | Role: Product Owner and Business Analyst, HunterTV Africa

Purpose

Shows the chain from business objective to requirement, design, user story and test, so every requirement has a reason to exist and a way to be verified.

Traceability

Objective	Business requirement	Functional req.	User stories	Tests	Status
OBJ-01: Take payment reliably and deliver tickets immediately	BR-01: Confirmed payments issue tickets in the same checkout session	FR-01, FR-02	US-01	UAT-01, UAT-02	Released
OBJ-02: Report revenue, balances and payouts accurately in each currency	BR-02: Revenue, wallet balances and payouts are held and shown per currency	FR-03, FR-04	US-02	UAT-03	Released
OBJ-04: Protect buyers, organisers and the platform through refunds, dispute evidence and security	BR-03: Gateway refunds cancel the ticket and notify the buyer	FR-05	None	UAT-04	Released
OBJ-03: Control event access through ticket ownership, team roles and scanning	BR-04: Organisers grant event access by role	FR-06	US-03	UAT-05	Released
OBJ-03: Control event access through ticket ownership, team roles and scanning	BR-05: Tickets can be sent, transferred and swapped without distorting revenue	FR-07	None	UAT-06	Released
