

## MoSCoW Prioritisation

Status: Delivered | Domain: Events and hospitality | Role: Product Owner and Business Analyst, HunterTV Africa

### Prioritisation basis

Priority reflects business criticality, user impact, risk and the minimum viable service. Could and Won't items are recorded so the scope conversation is visible.

### Prioritised scope

| Priority           | ID      | Item                                                        | Rationale                                                   |
|--------------------|---------|-------------------------------------------------------------|-------------------------------------------------------------|
| Must               | BR-01   | Each user group follows a route relevant to its purpose     | Needed for separate the three user journeys                 |
| Must               | BR-02   | Submissions cannot be completed with missing mandatory data | Needed for reduce incomplete records and manual follow-up   |
| Must               | BR-03   | Organisers can view every submission status                 | Needed for give organisers status and exception visibility  |
| Must               | BR-04   | Vendor decisions trigger the correct communication          | Needed for validate end-to-end communications before launch |
| Must               | BR-06   | Attendees receive purchase or registration confirmation     | Needed for validate end-to-end communications before launch |
| Should             | BR-05   | Volunteer allocation uses availability and need             | Needed for give organisers status and exception visibility  |
| Could              | Backlog | Automated volunteer shift reminders                         | Reduces no-shows once allocation is stable                  |
| Won't (this phase) | Backlog | Vendor payment collection                                   | Handled outside the platform for this season                |

### Review rule

Reassess priority when scope, risk, dependency or evidence changes.
