

Functional Requirements Document

Status: Completed | Domain: Tax technology and financial services | Role: Business Analyst (Contract)

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Eligibility questionnaire classifies PAYE, freelancer, BN or RC	Contradictory answers trigger a confirmation question
FR-02	BR-02	BN route shows state obligations; RC route shows federal obligations	Route cannot change after filing starts without reset
FR-03	BR-03	Income and deduction entries carry an evidence status	Status values: Uploaded, Pending, Not required
FR-04	BR-04	Result page itemises each rule, rate and value applied	Every line references a rule ID
FR-05	BR-05	Rule tables hold effective-from and effective-to dates	Calculation uses the version active on the tax period end date
FR-06	BR-06	Tracker shows File, Pay, Confirm, Certificate with next action	Stage advances only on confirmed evidence
FR-07	BR-07	Role-based access to taxpayer records with an access log	Reviewers see only cases assigned to them
FR-08	BR-08	Out-of-scope or low-confidence results route to the review queue	User sees a plain-language limitation message
FR-09	BR-09	Content editor publishes guidance with an effective date after approval	Unapproved drafts are never shown to users

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-01	As a freelancer, I want to be told which tax route applies to me, so that I do not file under the wrong category.	Given I answer the eligibility questions When I submit them Then I am routed to the freelancer journey with a plain-language reason
US-02	BR-04	As a small business owner, I want to see how my liability was calculated, so that I can check it before paying.	Given my calculation is complete When I open the result Then each rule, rate and value is listed with its rule version
US-03	BR-08	As a tax reviewer, I want to see the rule version and evidence for each referred case, so that I can assess the calculation quickly.	Given a case is referred to me When I open it Then rule version, inputs and evidence status are shown together
US-04	BR-09	As a content administrator, I want to update guidance with an effective date, so that published information stays controlled.	Given a rule change is approved When I publish the guidance Then it goes live on the effective date and the prior version is kept

Non-functional requirements

Area	Requirement
Security	Financial data encrypted at rest and in transit
Transparency	Every result shows rule version and scope limits
Accessibility	Plain-language guidance at each step

Area	Requirement
Auditability	Rule changes logged with approver

Key data

Field	Type	Allowed values
taxpayer_id	Text	Internal ID
taxpayer_type	Category	PAYE, Freelancer, BN, RC
income_value	Decimal	Naira, 2 dp
evidence_status	Category	Uploaded, Pending, Not required
rule_version	Text	RULE-YYYY-NN
journey_stage	Category	File, Pay, Confirm, Certificate
