

Business Requirements Document

Status: Concept / MVP design | Domain: SME commerce and retail technology | Role: Product Business Analyst

Business problem

Small merchants manage products, stock and orders across social media, messaging and separate tools, creating duplication, overselling and weak fulfilment visibility.

Objectives

ID	Objective
OBJ-01	Create one product and inventory source
OBJ-02	Connect selected selling channels
OBJ-03	Give every order a clear status
OBJ-04	Make setup usable for SMEs

Scope

In scope	Out of scope
Product catalogue Channel publishing Stock reservation Payment and delivery status Guided setup	Merchant lending Own delivery fleet

Business requirements

ID	Requirement	Priority	Objective	Acceptance criterion
BR-01	Maintain one product and inventory record	Must	OBJ-01	All selected channels use the same source
BR-02	Publish products to selected channels	Must	OBJ-02	Changes appear on each selected channel
BR-03	Prevent sale of unavailable stock	Must	OBJ-01	Insufficient stock blocks or flags the order
BR-04	Every order has status and a next action	Must	OBJ-03	Merchant can identify the next step for each order
BR-05	Guided setup for payment and delivery providers	Must	OBJ-04	Merchant completes setup without support

Assumptions and constraints

Assumptions	Constraints
Payment and delivery providers expose status APIs Merchants sell mostly on mobile	Unreliable connectivity in some regions Varied provider coverage by country

Key risks

ID	Risk	Severity	Response	Owner
R-01	Channel stock becomes inconsistent	High	Single inventory source and sync alerts	Product owner
R-02	Failed payment appears complete	High	Confirmed payment states only	Engineering lead
R-03	Setup is too complex for merchants	Medium	Guided wizard and usability tests	Business analyst
R-04	Provider outage blocks fulfilment	Medium	Exception queue and fallback provider	Operations
