

Functional Requirements Document

Status: Concept / MVP design | Domain: SME commerce and retail technology | Role: Product Business Analyst

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Product record holds variants, price and stock	Stock cannot go below zero
FR-02	BR-02	Merchant selects channels per product	Channel sync failure is shown on the product
FR-03	BR-03	Order reserves stock for 15 minutes pending payment	Unpaid reservations release automatically
FR-04	BR-04	Order timeline shows payment, fulfilment and delivery states	Next action displayed at the top of each order
FR-05	BR-05	Setup wizard lists providers available in the merchant country	Test transaction required before go-live

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-03	As a merchant, I want orders to reserve stock automatically, so that I never sell what I do not have.	Given one item is left When two customers order at once Then the second order is told the item is unavailable
US-02	BR-04	As a merchant, I want one timeline for each order, so that I know what to do next.	Given an order is paid When I open it Then the next action, Accept fulfilment, is shown first

Non-functional requirements

Area	Requirement
Mobile first	Core tasks usable on low-end Android devices
Resilience	Offline drafts sync when online
Security	Payment data handled by the provider, never stored

Key data

Field	Type	Allowed values
merchant_id	Text	MER-0001 format
product_id	Text	PRD-0001 format
channel	Category	Storefront, Instagram, WhatsApp, Facebook
available_stock	Integer	0 or more
order_status	Category	Placed, Reserved, Paid, In fulfilment, Delivered, Cancelled
delivery_status	Category	Awaiting pickup, In transit, Delivered, Failed
