

Business Requirements Document

Status: Product development | Domain: Event technology and payments | Role: Product Business Analyst

Business problem

Organisers need connected event setup, ticket ownership, scanning and settlement, while attendees need reliable purchase, transfer and refund journeys.

Objectives

ID	Objective
OBJ-01	Support organisers to configure and publish events
OBJ-02	Control the ticket lifecycle and ownership
OBJ-03	Prevent invalid entry at the door
OBJ-04	Keep money movements reconcilable and auditable

Scope

In scope	Out of scope
Event configuration Ticket purchase, transfer and refund Door scanning Settlement and payout	Venue seating maps Merchandise sales

Business requirements

ID	Requirement	Priority	Objective	Acceptance criterion
BR-01	Organisers can create single, recurring and multi-day events	Must	OBJ-01	Each event type validates its required settings
BR-02	Each issued ticket has exactly one valid owner state	Must	OBJ-02	Ownership history is retained for every change
BR-03	Transfer and refund rules are enforced	Must	OBJ-02	Invalid state transitions are rejected with a reason
BR-04	Scanning prevents duplicate or invalid entry	Must	OBJ-03	A second scan of the same ticket is rejected and flagged
BR-05	Settlement reconciles tickets, fees and refunds before payout	Must	OBJ-04	Variance is shown before payout is released

Assumptions and constraints

Assumptions	Constraints
Payment provider confirms payments by webhook Door staff have a connected device	Payment-provider rules on refunds Consumer-protection obligations on refunds

Key risks

ID	Risk	Severity	Response	Owner
R-01	Duplicate ticket ownership	High	State model and audit log	Product owner
R-02	Duplicate entry	High	Real-time scan validation	Product owner
R-03	Settlement variance	High	Pre-payout reconciliation	Finance lead
R-04	Refund or transfer abuse	High	Eligibility and permission rules	Product owner
