

Business Requirements Document

Status: Concept / MVP design | Domain: ESG, compliance and sustainability technology | Role: Product Business Analyst

Business problem

SMEs hold ESG evidence in photos, PDFs and spreadsheets without source context, so reports are slow to assemble and hard for auditors to trust.

Objectives

ID	Objective
OBJ-01	Capture source evidence with metadata
OBJ-02	Keep a human validation step before approval
OBJ-03	Maintain controlled, auditable records
OBJ-04	Generate framework-aligned outputs

Scope

In scope	Out of scope
Mobile and upload capture AI extraction with human validation Versioned evidence ledger GHG, ISO and CSRD views	Carbon-offset trading Formal assurance opinions

Business requirements

ID	Requirement	Priority	Objective	Acceptance criterion
BR-01	Evidence retains source and capture metadata	Must	OBJ-01	Every record links to its original source
BR-02	AI extraction is reviewed before approval	Must	OBJ-02	Unvalidated content is clearly labelled
BR-03	Corrections preserve audit history	Must	OBJ-03	Prior and current values remain traceable
BR-04	Views follow stakeholder permissions	Must	OBJ-03	Unauthorised evidence is never displayed
BR-05	Reports identify framework and version	Should	OBJ-04	Output records framework name and version

Assumptions and constraints

Assumptions	Constraints
Auditors accept source-linked digital evidence Framework specialists maintain mappings	Location data is personal data in some contexts Frameworks update on their own timelines

Key risks

ID	Risk	Severity	Response	Owner
R-01	AI misclassifies evidence	High	Mandatory human validation	Product owner
R-02	Location data creates privacy risk	High	Purpose limitation and precision control	Data protection lead
R-03	Immutable record blocks lawful correction	High	Append-only correction model	Product owner
R-04	Framework requirements change	High	Effective-dated mappings	Framework specialist
