

UAT and Validation Plan

Status: Concept / MVP design | Domain: ESG, compliance and sustainability technology | Role: Product Business Analyst

Approach

Scenarios come from the acceptance criteria. Defects are logged with reproduction steps, fixed and retested before closure. Scenarios are defined to validate the MVP; none have been run.

Test scenarios

Test	Req.	Given	When	Then	Status
UAT-01	BR-01	a photo is captured	the record is opened	hash, timestamp and permitted location are shown	Planned
UAT-02	BR-02	extracted values in Draft	a report is generated	draft values are excluded and flagged	Planned
UAT-03	BR-03	an approved value is corrected	history is viewed	both versions show with reason and approver	Planned
UAT-04	BR-04	an investor user	they open raw evidence	access is denied	Planned
UAT-05	BR-05	a CSRD report	it is exported	framework and mapping version appear on the output	Planned

Exit criteria

- All Must scenarios pass
- High-severity defects fixed or formally accepted
- Business owner confirms the outcome
- Known limitations and follow-up actions recorded
