

Functional Requirements Document

Status: Delivered evaluation work | Domain: Artificial intelligence services | Role: AI Evaluation Contractor

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Task view shows the guidance version and change notes	Superseded versions are read-only
FR-02	BR-02	Rating form lists factuality, completeness, reasoning and adherence	Submission blocked until every criterion is rated
FR-03	BR-03	Rationale field requires an evidence reference	Flags: hallucination, contradiction, missing requirement
FR-04	BR-04	Escalate button routes the case to the guidance owner	Escalated tasks pause until answered

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-03	As a quality reviewer, I want rationales that point to specific evidence, so that I can verify a decision quickly.	Given an evaluator flags a hallucination When they submit Then the rationale shows the exact claim and why it is unsupported

Non-functional requirements

Area	Requirement
Confidentiality	Task content never leaves the platform
Consistency	Agreement rate tracked by criterion
Traceability	Every decision tied to a guidance version

Key data

Field	Type	Allowed values
task_id	Text	Platform ID
criteria_version	Text	vN
criterion	Category	Factuality, Completeness, Reasoning, Adherence
rating	Category	Per rubric scale
rationale	Text	Must cite evidence
quality_status	Category	Not sampled, Agreed, Disagreed
