

TRANSFERABLE ANALYSIS

Healthcare Facilities Request Handling

Impact-based triage, named escalation and recurrence review for facilities requests

Status: Generalised operational analysis

Domain: Healthcare support services

Role: Facilities and quality support

The problem and what discovery found

Business problem

Facilities requests in a healthcare setting can arrive without impact context, stall on access or resource constraints, and recur without anyone seeing the pattern.

What the analysis found

1

Requests often lack location, timing or impact detail

2

Access and resource constraints are not visible to supervisors

3

Recurring issues are handled one at a time

As-Is process

Full-resolution SVG is in the Diagrams folder

Healthcare Facilities Requests: As-Is process

Current state before the redesign. Orange activities are the pain points found in discovery.

To-Be process

Full-resolution SVG is in the Diagrams folder

Healthcare Facilities Requests: To-Be process

Redesigned future state, with every decision outcome labelled.

What changed

Area	Before	After
Intake	Verbal or informal messages	Location, timing and impact captured
Priority	Judged from limited detail	Safety flag and impact classification
Escalation	Constraint handled ad hoc	Named owner and target date
Recurrence	Seen one at a time	Monthly pattern review

How success will be measured

No live outcomes are claimed for this case

Measure	Current evidence status	How it will be used
Response by priority	Illustrative measure	Check against local standards
Escalation age	Illustrative measure	Review at supervisor huddle
Repeat rate	Illustrative measure	Target decreasing trend

Recommendations and key risks

Recommended next actions

- Use impact questions at intake
- Review escalations daily
- Group repeats monthly by location
- Keep patient data out of request records

Risks with a named owner

R-01

Urgent issue misprioritised

Impact criteria and safety flag

R-02

Record lacks evidence

Required intake fields

R-03

Sensitive information disclosed

No patient data in requests

R-04

Recurring issue stays local

Monthly recurrence review
