

Business Requirements Document

Status: Generalised operational analysis | Domain: Healthcare support services | Role: Facilities and quality support

Business problem

Facilities requests in a healthcare setting can arrive without impact context, stall on access or resource constraints, and recur without anyone seeing the pattern.

Objectives

ID	Objective
OBJ-01	Record service requests accurately
OBJ-02	Prioritise by safety impact and urgency
OBJ-03	Escalate constraints through a named route
OBJ-04	Use recurrence evidence for corrective action

Scope

In scope	Out of scope
Request intake Priority classification Escalation Closure evidence Recurrence review	Clinical decisions Estates capital planning

Business requirements

ID	Requirement	Priority	Objective	Acceptance criterion
BR-01	Requests record location, timing and impact	Must	OBJ-01	Required facts are present before work is assigned
BR-02	Safety and infection risks are prioritised immediately	Must	OBJ-02	High-risk requests are escalated at intake
BR-03	Access and resource constraints have a named owner	Must	OBJ-03	Escalation owner and status are visible
BR-04	Closure evidence is retained	Should	OBJ-01	Closure is recorded consistently
BR-05	Recurring issues can be identified	Should	OBJ-04	Records can be grouped by type and location

Assumptions and constraints

Assumptions	Constraints
Local procedures define safety priorities Supervisors own escalations	Infection-prevention rules Confidentiality of patient areas

Key risks

ID	Risk	Severity	Response	Owner
R-01	Urgent issue misprioritised	High	Impact criteria and safety flag	Supervisor
R-02	Record lacks evidence	Medium	Required intake fields	Facilities lead
R-03	Sensitive information disclosed	High	No patient data in requests	Supervisor
R-04	Recurring issue stays local	Medium	Monthly recurrence review	Quality lead
