

Functional Requirements Document

Status: Generalised operational analysis | Domain: Healthcare support services | Role: Facilities and quality support

Purpose

Describes how the solution must behave so each business requirement can be designed, built and tested. Each functional requirement traces to a parent business requirement.

Functional requirements

ID	Parent	System behaviour	Business rule or validation
FR-01	BR-01	Intake captures location, time, issue type and impact	Submission blocked if impact is missing
FR-02	BR-02	Safety or infection flag sets top priority	Flagged requests notify the supervisor
FR-03	BR-03	Escalation records owner, constraint and target date	Open escalations listed by age
FR-04	BR-04	Closure requires completion note	Closed requests cannot be edited
FR-05	BR-05	Monthly view groups requests by type and location	Three or more repeats flag a pattern

User stories

ID	Parent	Story	Acceptance (Given / When / Then)
US-01	BR-05	As a supervisor, I want to see repeat issues by location, so that I can fix causes, not symptoms.	Given a month of closed requests When I open the recurrence view Then locations with three or more repeats are flagged

Non-functional requirements

Area	Requirement
Confidentiality	No patient-identifiable data in requests
Timeliness	Safety flags acknowledged within the shift
Auditability	Closure notes time-stamped

Key data
