

UAT and Validation Plan

Status: Generalised operational analysis | Domain: Healthcare support services | Role: Facilities and quality support

Approach

Scenarios come from the acceptance criteria. Defects are logged with reproduction steps, fixed and retested before closure. Scenarios illustrate how the requirements would be verified.

Test scenarios

Test	Req.	Given	When	Then	Status
UAT-01	BR-01	a request without impact	it is submitted	submission is blocked	Not applicable (analysis only)
UAT-02	BR-02	an infection-risk request	it is submitted	it is top priority and the supervisor is notified	Not applicable (analysis only)
UAT-03	BR-03	an access constraint	it is escalated	owner and target date are recorded	Not applicable (analysis only)
UAT-04	BR-04	a completed task	it is closed	a completion note is required	Not applicable (analysis only)
UAT-05	BR-05	three repeats in one location	the monthly view opens	the location is flagged	Not applicable (analysis only)

Exit criteria

- All Must scenarios pass
- High-severity defects fixed or formally accepted
- Business owner confirms the outcome
- Known limitations and follow-up actions recorded
